## PROFESSIONAL SUMMARY

---

Python Backend Developer with hands-on experience in building secure and scalable web applications using Python, Django, Django REST Framework, and Flask. Skilled in developing REST APIs, implementing JWT authentication and RBAC, and working with relational databases such as PostgreSQL, MySQL, and SQLite. Experienced in Django ORM, query optimization, caching, middleware, logging, and API testing using Postman. Strong understanding of backend development, OOP concepts, database design, and writing clean, maintainable code.

### TECHNICAL SKILLS:

- **Programming Languages:** Python, SQL
- **Backend Frameworks:** Django, Django REST Framework (DRF), Flask
- **Databases:** PostgreSQL, MySQL, SQLite, Firebase
- **Authentication:** JWT, RBAC, REST APIs
- **Python Libraries:** Pandas, NumPy, Matplotlib
- **Tools & Technologies:** Git, GitHub, Postman, Visual Studio Code
- **Performance:** Django ORM, Query Optimization, Caching, Middleware, Logging
- **Web Technologies:** HTML, CSS, Bootstrap, Jinja2
- **Concepts:** OOP, CRUD Operations, MVC/MVT, API Development, Database Design

### PROJECT:

#### HRMS Automation System | Django REST Framework

- Developed secure REST APIs using Django REST Framework.
- Implemented JWT Authentication and Role-Based Access Control (RBAC).
- Optimized database performance using Django ORM, caching, and query optimization.
- Integrated PostgreSQL, logging, middleware, and reporting features.
- Optimized database queries using `select_related()` and `prefetch_related()`.
- Implemented caching to improve dashboard performance.
- Implemented caching to improve dashboard performance.
- Used Git for version control and Postman for API testing.

#### Tourist Website (Mobile Application)

- Developed and deployed a location-based mobile application delivering real-time weather, tide, and amenities data for 50+ beaches across India.
- Integrated Google Maps API to enable geolocation tracking, route navigation, and intelligent beach discovery features.
- Implemented secure backend services using Firebase Realtime Database, including user authentication and cloud data management.
- Enhanced user engagement through multilingual UI design, push notifications for safety alerts, and a structured review and feedback system.

## Internships / Training

---

### Cod Soft

Python Developer Intern  
2024

June 2024 – July

- Developed Python-based applications including calculator, to-do list, and game logic programs.
- Applied object-oriented programming (OOP) principles and modular coding practices.
- Debugged and optimized Python scripts to improve performance and code efficiency.

- Performed unit testing and validated application functionality.
- Collaborated with mentors to follow structured development workflows.

## **EDUCATION**

### **J.N.N Institute of Engineering**

B. Tech, Electronics and communication

Chennai, Tamil Nadu, India

Graduated: May 2025

CGPA: 8.00

### **Vignan Junior College**

Intermediate-MPC

Nellore, Andhra Pradesh, India

May 2021

Percentage: 94.7%

## **KEY ACHIEVEMENTS:**

- Developed multiple backend applications using Django and Flask.
- Built secure REST APIs using Django REST Framework.
- Implemented JWT Authentication and Role-Based Access Control.
- Hands-on experience with PostgreSQL, SQLite, Firebase, and MySQL.
- Implemented performance optimization techniques including caching and query optimization.
- Strong understanding of software engineering best practices, debugging, and API development.
- Experience using Git, GitHub, and Postman in collaborative development.

## **INTERESTS:**

- Backend Development, Python Programming, REST API Development, Database Design, Software Engineering, Problem Solving, Data Analysis, Exploring New Technologies.
